## Introduction

BuiltWith Pty Ltd (BuiltWith) is an internet based business with the majority of its operation occurring online.

## Purpose

To explain how BuiltWith secures and continually monitors the security of its online operations.

## PCI Compliance

BuiltWith Pty Ltd publicly available endpoints are monitored by Utah based data security and compliance company SecurityMetrics.

Continuous PCI DSS audits ensure our public servers are data security standard compliant for banking transactions and data transactions.

## SSL

All public endpoints to BuiltWith can be accessed using SSL 3072bit+ Encryption.

## Software Update

BuiltWith public endpoint servers run either –

- Windows Hyper-V Server 2016
  - Windows Update Scheduled Updates
- Ubuntu Server 18.04.3
  - AutomaticSecurityUpdates Package

## Data Center Compliances

BuiltWith Pty Ltd physical servers are stored in ISO 27001:2005 and SOC 1 and 2 certified locations in North America.

## Login Security

All administration points of our servers are secured by Firewall IP scoping and securely generated random passwords changed on a bi-annual basis.
